EXAMINER

BURD, KEVIN MICHAEL

ART UNIT	PAPER NUMBER
----------	--------------

2611

DATE MAILED: 08/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/511,640	Applicant(s) LIU ET AL.	
	Examiner Kevin M. Burd	Art Unit 2611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 October 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 October 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☒ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Paper No(s)/Mail Date _____ | 6) <input type="checkbox"/> Other: _____ |

Priority

1. Applicant has claimed the benefit, under 35 USC 365 of International Application PCT/US03/11627, filed April 15, 2003. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. Figure 1 is the same as figure 1 of Wang (US 6,266,380) See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-6, 8 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Janesch et al (US 6,072,842).

Regarding claims 1 and 8, Janesch discloses a method and processor for establishing timing synchronism between a transmitter symbol clock (received signal 158) and a local symbol clock in a receiver (feedback signal 155) as shown in figure 5. The received signal is transmitted at some frequency and contains an initial offset (abstract). The receiver stores the initial offset value in a memory so when phase lock is to occur, the carrier recovery loop is close to the desired phase lock (column 2, lines 36-43). A comparison between the received signal and the feedback signal is conducted and a difference is measured in the phase detector 164. This difference adjusts the feedback signal by a predetermined number until the received signal and the feedback signal are equal.

Regarding claims 3 and 10, the range of the carrier recover will be at least plus or minus 1 kHz.

Regarding claims 4 and 11, the preselected offsets are any possible difference value between the received signal and the initially offset feedback signal. This group of values includes nine values.

Regarding claims 5 and 12, the preselected offsets include any difference value between the received signal and the initially offset feedback signal.

Regarding claims 6, 13 and 14, the method will be conducted in any amount of

steps needed to ensure proper phase lock.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janesch et al (US 6,072,842) in view of Wang (US 6,266,380).

Regarding claims 2 and 9, Janesch discloses the method and processor as stated above. Janesch does not disclose the received signal carries a high definition television (HDTV) signal transmitted as a modulated vestigial sideband (VSB) signal formatted as a one-dimensional data constellation of symbols representing digital image data. Wang discloses a receiver for receiving a signal carrying an HDTV signal where the received signal is a carrier suppressed 8-VSB modulated signal and the VSB signal is represented by a one-dimensional data symbol constellation (column 1, line 66 to column 2, line 11). Wang further discloses an all digital phase lock loop is used for timing recovery (column 2, lines 33-43). It would have been obvious for one of ordinary skill at the time of the invention to combine the signal of Wang into the method and processor of Janesch. This would allow the received HDTV signal to be synchronized between the transmitter and receiver. This allows the recovery of the data to be performed correctly and with minimal errors.

5. Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janesch et al (US 6,072,842) in view of Guillemain et al (US 6,175,600).

Regarding claims 7 and 15, Janesch discloses a method and processor for establishing timing synchronism between a transmitter symbol clock (received signal 158) and a local symbol clock in a receiver (feedback signal 155) as stated above. Janesch does not disclose the specific type of recovery algorithms used. Guillemain discloses using the Mueller and Muller algorithm and the Gardner algorithm for timing recovery (column 5, lines 9-13). These algorithms are well known in the art and it would have been obvious for one of ordinary skill in the art at the time of the invention to utilize these well known algorithms to recover the proper timing of the carrier received in the method and processor of Janesch. Achieving fast and correct timing is using these algorithms is important since demodulation and further processing of the received signal can not occur until phase lock is established.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Burd whose telephone number is (571) 272-3008. The examiner can normally be reached on Monday - Friday 9 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
